

Vrutik Parvadiya

Pune, Maharashtra, India | vrutikparvadiya01@gmail.com | [linkedin.com/in/vrutikparvadiya](https://www.linkedin.com/in/vrutikparvadiya) | [LeetCode Profile](#)

Professional Summary

Module Lead with 5+ years of experience architecting and scaling enterprise-grade LMS and CMS platforms. Proven track record in system modernization, cloud-native development, and technical leadership. Expert in designing high-concurrency services using microservices architecture, asynchronous processing, and distributed systems. Strong background in competitive programming and data structures & algorithms.

Technical Skills

Languages: C#, JavaScript, TypeScript, Node.js, SQL, Python (Competitive Programming)

Frameworks: .NET Core, Entity Framework Core, Express.js, Angular, React.js, Serverless Framework

Cloud/DevOps: Azure (Service Bus, Cosmos DB, Entra ID/Azure AD, Key Vault, Blobs), AWS (Lambda, S3, API Gateway, CloudWatch), Docker, Kubernetes (Orchestration)

Architecture & Security: Event-Driven Architecture, Microservices, OAuth 2.0 / OpenID Connect, Message-Driven Systems (Kafka/RabbitMQ), System Design

Tools/Databases: MySQL, PostgreSQL, MongoDB, Redis, REST APIs, GitHub Copilot, CI/CD, XUnit, JMeter, Git

Professional Experience

Module Lead

July 2025 – Present

Zeus Learning

Mumbai, Maharashtra, India

- Architected and scaled enterprise LMS/CMS platforms serving thousands of concurrent users, ensuring high availability and fault tolerance through robust microservices design.
- Spearheaded modernization initiatives, refactoring legacy monolithic flows into asynchronous, message-driven architectures (Azure Service Bus), reducing blocking operations by ~40%
- Mentored team of 12+ developers through code reviews, design discussions, and implementation of best practices
- Engineered Docker-based Dev Containers, achieving 100% environment consistency across the development team and reducing onboarding time for new developers
- Optimized database performance by redesigning stored procedures and indexing strategies, resulting in a 30%+ reduction in query execution time and resolving critical deadlocks

Senior Software Engineer

July 2023 – June 2025

Zeus Learning

Mumbai, Maharashtra, India

- Engineered and developed scalable LMS/CMS platforms using .NET (C#), Angular, Node.js, and TypeScript with focus on modularity and clean architecture principles
- Built high-performance backend services and RESTful APIs processing 10,000+ requests daily with optimized response times
- Leveraged Azure cloud services (Entra ID, Key Vault, Cosmos DB, Blob Storage, Service Bus Queues) for secure, scalable solutions
- Established comprehensive testing framework using XUnit achieving 85%+ code coverage and documented APIs with Swagger

Software Engineer

June 2021 – June 2023

Zeus Learning

Mumbai, Maharashtra, India

- Built a serverless Space & Room Reservation platform using AWS Lambda, API Gateway, and S3 with Express.js and TypeScript framework, ensuring high availability and seamless auto-scaling
- Integrated 8+ third-party services (GSuite, Microsoft Outlook, ServiceNow, Condeco, Zoom, Teams, Meet) via APIs and SDKs, enhancing platform interoperability
- Implemented real-time notification systems and video conferencing features enhancing user engagement by 40%
- Utilized AWS services (CloudWatch, X-Ray, Secret Manager) for monitoring, distributed tracing, and secure credential management

Project Intern

December 2019 – March 2021

CDAC, Kharghar

Navi Mumbai, Maharashtra, India

- Developed Raspberry Pi-based autonomous robot featuring live streaming, line-following, and obstacle detection
- Designed responsive web-based control interface using Bootstrap, HTML, and CSS for real-time robot operation

Education

Saraswati College of Engineering

Navi Mumbai, Maharashtra, India

Bachelor of Engineering in Computer Engineering

2017 – 2021
